

AgFlo Solution

PRECISELY AFFORDABLE

No more guesswork — this connected, autonomous sensor lets you remotely monitor silo fill levels at a highly competitive cost.

EVERYONE WINS!

- Eliminate last-minute orders
- Eliminate the need for manual inventory checks
- Optimize your feed production and deliveries

Compatible Silo Dimensions	Maximum height: 10m (33pi) Maximum diameter 4,6m (15pi)
----------------------------	--

Measurement frequency	Configurable as needed
-----------------------	------------------------

Precision	+/- 5 à 7 % depending on installation
-----------	---------------------------------------

Power supply	8x AA Lithium batteries (included)
--------------	------------------------------------

Battery life	Approximately 2 years, depending on LTE connectivity quality and the number of transmissions per day
--------------	--

Connectivity	Wireless LTE-M communication
--------------	------------------------------

Weather resistance	IP65
--------------------	------

Data access	Available directly through a web dashboard or easily integrated into your ERP via our API
-------------	---

Dimensions	37x15x15cm (14,5"x6"x6")
------------	--------------------------

Installation	Installs in less than 15 minutes — no silo modification required
--------------	--

Warranty	1 year
